

VELIDI JESWANTH KUMAR

B.Tech Computer Science Engineering (Data Science) | Fresher

+91 6281690790 | jeswanthk00@gmail.com | [LinkedIn](#) | [GitHub](#) | Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate specializing in Data Science with a strong foundation in full-stack web development, database management, and software engineering principles. Proficient in Java, Python, JavaScript, Node.js, and MySQL with hands-on experience delivering real-world applications. Demonstrated ability to optimize database performance, build RESTful APIs, and develop responsive front-end interfaces. Seeking a software engineering or web development internship to apply technical skills and contribute to impactful, scalable solutions.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: Node.js, Express.js, Pandas, NumPy

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Visual Studio Code, Jupyter Notebook, Arduino, Microsoft Power BI, PowerPoint

Concepts: RESTful API Design, OOP, Database Optimization, Index Optimization, Responsive Web Design, Full-Stack Development, SDLC

EDUCATION

B.Tech – Computer Science Engineering (Data Science) | Presidency University, Bengaluru, Karnataka 08/2022 – 07/2026
CGPA: 8.12 / 10.0

PROJECTS

Food Delivery Web Application | Java Full Stack Development 05/2026 – 07/2026

- Developed a full-stack **Food Delivery Web Application** using **Java, Servlets, JSP, JDBC, and MySQL**, following the **MVC architecture**.
- Implemented **secure user authentication** using **BCrypt**, session management, shopping cart, order placement, and role-based access control.
- Designed a **normalized MySQL database** and developed secure CRUD operations using **JDBC PreparedStatement** to prevent SQL Injection.
- Built responsive user interfaces for restaurant browsing, menu management, cart, checkout, and user profile using **HTML5, CSS3, JavaScript, and JSP**.
- Technologies: Java, JDBC, Servlets, JSP, HTML5, CSS3, JavaScript, MySQL, Apache Tomcat

Campus Monitoring System | Full-Stack Web Application 02/2026 – 04/2026

- Architected and led development of a full-stack student monitoring system using Node.js, JavaScript, and MySQL that automates academic tracking and delivers real-time performance insights.
- Designed and implemented RESTful APIs for secure **CRUD operations** on student attendance and performance data, reducing manual reporting time significantly.
- Built a responsive frontend dashboard for real-time data visualization and management, improving administrative efficiency.
- Applied **MVC architecture** to ensure clean code separation, scalability, and maintainability across the application.
- Technologies: Node.js, JavaScript, MySQL, HTML5, CSS3, RESTful API

Legal Services Platform | E-Marketplace Web Application 09/2025 – 11/2025

- Designed and developed a full-stack e-marketplace connecting citizens with verified legal professionals, improving access to legal services.
- Built an incentive model to onboard legal service providers, resulting in a structured and scalable platform ecosystem.
- Implemented a **MySQL-backed database schema** for managing user profiles, service listings, and transaction records.
- Developed a clean, accessible UI to enhance user experience for non-technical audiences seeking legal assistance.
- Technologies: HTML5, CSS3, JavaScript, MySQL

KEY ACHIEVEMENTS

- Leadership: Led end-to-end design and development of a full-stack Campus Monitoring System, coordinating technical architecture and implementation.
- Performance Engineering: Achieved a 40% improvement in database query efficiency through strategic index optimization on MySQL tables.
- Academic Excellence: Maintained a CGPA of 8.12/10 while building multiple production-grade web applications concurrently.
